IDENTIFIERS	*University of Florida

ABSTRACT

This report presents the results of a systematic study and evaluation of the existing educational plants of the University of Florida's Institute of Food and Agricultural Sciences (IFAS), along with a determination of future plant needs. Section 1 contains an introduction to the educational plant survey, including statutory foundations, procedural policies, and cooperative processes. Section 2 provides an overview of the IFAS, while Section 3 contains an analysis of the student population, including planned enrollments and enrollment trends. Section 4 reviews the academic programs of the university as related to the IFAS. Section 5, the bulk of the report, contains an inventory of existing sites and buildings. Section 6 presents plans for housing programs, students, personnel, and services in the coming years, while section 7 analyzes capital outlay finances. Section 8 contains recommendations for educational plants at the main campus and at the Austin Cary Forest site, as well as university-wide standard recommendations. (MDM)

EDUCATIONAL PLANT SURVEY TEAM

Survey team members participating in the educational plant survey for the University of Florida, Institute of Food and Agricultural Sciences, On Campus - Alachua County, included staff from the Board of Regents of the State University System and staff from the Department of Education.

MEMBERS FROM OFFICE OF EDUCATIONAL FACILITIES

Mr. David J. Tranchand
Survey Director and Editor
Educational Facilities Specialist
Office of Educational Facilities
Department of Education

Ms. Loyce K. Farr
Program Director I
Office of Educational Facilities
Department of Education

MEMBER FROM THE BOARD OF REGENTS

Ms. Terry A. Fulcher
Coordinator, Space Utilization and Analysis
Office of Capital Budgets
Florida Board of Regents

PREFACE

An educational plant survey is a systematic study and evaluation of existing educational plants and the determination of future educational plant needs with respect to provision of appropriate facilities for accommodating educational programs and services for students. At least every five years, the Board of Regents of the State University System arranges for an educational plant survey for each university within the State University System pursuant to the requirement of Section 235.15, Florida Statutes (F.S.). The purpose of the survey is to aid the formulation of plans for housing the educational program, student population, faculty, administrators, staff, and auxiliary and ancillary services of the university for the following five-year period.

This publication, prepared for the Board of Regents and for the University of Florida, is the report of findings of the educational plant survey for the Institute of Food and Agricultural Sciences, Alachua County, conducted April 4 - 5, 1994. The report contains recommendations for the educational plants of the Institute for the period from April 4, 1994 through June 30, 1999. The recommendations herein supersede all previous survey recommendations not implemented as of April 4, 1994, by either execution of a construction contract or issuance of a purchase order.

The findings and recommendations contained in the survey report enable the university, the university president, the Chancellor of the State University System, and the Board of Regents to accomplish certain responsibilities with which they are vested. They provide the university with bases for the preparation of building programs submitted for review to the Board of Regents and the Office of the Governor under Rule 6C-14.020(1), Florida Administrative Code (FAC). They enable the university president to be judicious in submitting to the Chancellor plans for construction, renovation, and campus development under Rule 6C-4.01(3), FAC, and in recommending to the Chancellor a master plan for physical plants and grounds under Rule 6C-4.01(5)(c), FAC.

They assist the Chancellor in approving building programs, major renovations of campus facilities, and facilities budgets under Rule 6C-1.10(2)(i)2, FAC, and in recommending to the Board of Regents the allocation of construction funds within the State University System under Rule 6C-1.10(2)(i)1, FAC. They support the Board of Regents in adopting a proposed long-range plan for educational plants and auxiliary and ancillary facilities under Section 235.16, F.S., in adopting a capital outlay budget as part of the annual budget under Section 235.18, F.S., in preparing fixed capital outlay legislative budget requests under Section 240.209(3)(d), F.S., and in submitting to the Commissioner of Education a three-year plan and data required for development of the annual legislative capital outlay budget request under Section 235.41(2), F.S.

Additionally, the survey report serves to satisfy the mandate of Section 240.295(1), F.S., that no construction of new facilities or remodeling of existing ones, with certain limited exceptions, shall occur without being recommended in an educational plant survey. Finally, pursuant to Section 235.435(4)(a), F.S., all remodeling, renovation, and new construction projects included in the three-year priority list for legislative funding, prepared by the Board of Regents for the capital outlay budget request, must have been recommended by a survey.

The survey team gratefully acknowledges the contributions of time, effort, and expertise made by everyone who participated in the survey process: members of the faculty, staff, and administration of the University of Florida, the staff and administration of the Institute of Food and Agricultural Sciences, staff of the Board of Regents, and staff of the Department of Education.

Section I

INTRODUCTION TO THE EDUCATIONAL PLANT SURVEY

The educational plant survey is the initial planning phase for providing public educational plants in the State of Florida. Careful planning contributes to appropriate housing of educational programs and services for students and to wise expenditure of public funds. The university educational plant survey is established in the Statutes of Florida and the Florida Administrative Code.

Statutory Foundations

The statutory foundations for educational plant surveys are described below.

Legal Basis

The legal basis for the educational plant survey is established in Section 235.15, Florida Statutes:

> **Educational plant survey required.**--At least every 5 years, each board, including the Board of Regents, shall arrange for an educational plant survey, to aid in formulating plans for housing the educational program and student population, faculty, administrators, staff, and auxiliary and ancillary services of the district or campus. Before educational plant survey of a school district or community college that delivers vocational or adult education programs, the Division of Vocational, Adult, and Community Education shall establish and transmit to the Office of Educational Facilities documentation of the need for additional vocational and adult education programs and the continuation of existing programs before facility construction or renovation related to vocational or adult education may be included in the educational plant survey. Information used by the Division of Vocational, Adult, and Community Education to establish facility needs must include, but need not be limited to, labor market data, needs analysis, and information submitted by the school district or community college. Each survey shall be conducted by the Department of Education or an agency approved by the commissioner. Surveys conducted by agencies other than the Department of Education shall be reviewed and approved by the commissioner. The survey report shall include at least an inventory of existing educational and ancillary plants; recommendations for existing educational and ancillary plants; recommendations for new educational or ancillary plants, including the general location of each; the utilization of school plants based on an

extended school day or year-round operation; and such other information as may be required by the rules of the State Board of Education. An official copy of each survey report shall be filed by the board with the office. This report may be amended, if conditions warrant, at the request of the board or commissioner. Relocatables shall be included in the school district inventory of facilities, but shall only be rated at one-half of actual student capacity for purposes of the inventory and future needs determination.

Definition

"Educational plant survey" means a systematic study of present educational and ancillary plants and the determination of future needs to provide an appropriate educational program and services for each student.

Purpose

The purpose of a university educational plant survey is to aid the university and the Board of Regents in formulating plans for housing the educational program and student population, faculty, administrators, staff, and auxiliary and ancillary services of the university for the following five-year period.

Requirement

At least every five years, the Board of Regents shall arrange for an educational plant survey for each university within the State University System.

Alternative Methods

An educational plant survey shall be conducted either by the Department of Education or by an agency approved by the Commissioner of Education. Surveys conducted by agencies other than the Department of Education shall be reviewed and approved by the Commissioner.

Status of Prior Surveys

A new educational plant survey shall supersede, as of the date it is conducted, all previous survey recommendations which have not been implemented either by execution of a construction contract or issuance of a purchase order.

Amendment of Current Survey

The current survey may be amended during the projection period if conditions appear to justify a change in the projected building construction program by request for a supplementary survey made by the Board of Regents or the Commissioner of Education.

13

Written Report

A written report containing the findings of the educational plant survey and recommendations for housing the educational programs and projected student population of the university shall be made to the university administration and the Board of Regents. An official copy of each survey report shall be filed by the Board with the Office of Educational Facilities.

Procedural Policies

Procedural policies incorporated in the educational plant survey process for universities are explained below.

Student Enrollment Projections

The survey uses five-year capital outlay full-time-equivalent student enrollment (COFTE) projections prepared by the Board of Regents. Projections are provided for all credit activity at each site for which facilities are required.

Educational Programs

The survey formulates a plan for housing the programs and services provided by the university. The plan is based on projections for programs approved by the Board of Regents through the academic program review process for the State University System.

Facility Needs

Survey evaluation and planning are conducted with reference to facility needs as determined by the fixed capital outlay ten-space-category needs generation formula. Driven by the COFTE projection, the formula involves performance levels for space use by the university based on legislatively mandated as well as generally accepted utilization standards. Additional facility needs are identified through the exception procedure. This method is used where the university has special problems or extraordinary needs not supported by the formula.

Physical Facilities Inventory

The survey uses the information about existing educational plants carried in the computerized physical facilities space file for the university which contains data for sites, buildings, and rooms. The inventory is validated through cooperative efforts of staff of the university, the Board of Regents, and the Office of Educational Facilities. One part of the validation process is the review of all spaces declared to be exempt or ineligible. These are spaces not generated by the ten-space-category needs formula and thus not included in the ten aggregate inventory square footages for the survey.

Space Utilization

Space evaluation and planning are conducted with regard to standard utilization criteria for instructional spaces. Criteria for classrooms are: 65 hours of room use per week, Monday through Saturday; 90 percent rate of room occupancy; 60 percent rate of station occupancy; and a specific number of average weekly student hours per COFTE for each discipline.

Standards for teaching laboratories are: 24 hours of room use per week for lower level courses and 20 hours of room use per week for upper level and graduate level courses; 80 percent rate of station occupancy; and a specific number of average weekly student hours per COFTE for each discipline.

Recommendations

The survey makes recommendations for site acquisition, development, and improvement, remodeling, renovation, and new construction for sites and facilities for which titles are vested in the Board of Regents in trust by the Department of Natural Resources, Internal Improvement Trust Fund. Standard recommendations are included for provision of custodial services facilities, pro-vision of sanitation facilities, correction of safety deficiencies, replacement of defective roofs, and modification for compliance with accessibility requirements for persons with disabilities.

Recommendations for leased sites and facilities are made in accordance with the provisions of Section 235.055 and 235.056, F.S. Recommendations pertaining to additional branch campuses, centers, and special purpose centers are considered only after a proposal for establishment submitted by the university has been recommended by the Board of Regents as well as the Postsecondary Education Planning Commission, approved by the State Board of Education, and authorized by the Florida Legislature.

State Funds

Survey recommendations establish need for capital outlay projects; they do not imply automatic availability of funds to pay for projects. Information about state funds for public education capital outlay projects and about eligibility for expenditure is found in Section 9(a)(2) of Article XII of the State Constitution, as amended, Chapters 235 and 240 of the Florida Statutes, and Rules 6A-2, 6C-1, 6C-7, 6C-9, and 6C-14 of the Florida Administrative Code.

Cooperative Process

A university educational plant survey conducted for the Board of Regents of the State University System, by the Department of Education, is accomplished through cooperative efforts of the university administration, staff of the Board of Regents, and staff of the Office of Educational Facilities. The steps in the cooperative survey process are listed below.

1. The Board of Regents, acting for and on behalf of the university, requests, by resolution, that the Department of Education conduct a survey to determine the status and needs of the educational plants of the university.

2. The director of the Educational Facilities Planning and Evaluation Section (Planning and Evaluation), Office of Educational Facilities, schedules the segments of the survey, appoints the survey director, and designates survey staff from the Department of Education.

3. The university president appoints the survey coordinator for the university.

4. The Chancellor appoints the survey advisor for the Board of Regents.

5. The survey director and other Planning and Evaluation staff are available for consultation and service to both the university and the Board of Regents throughout the survey process.

6. The survey director receives the five-year capital outlay full-time-equivalent student enrollment projections prepared by the Board of Regents from the survey advisor and gives them to the survey coordinator.

7. The university receives approval for program proposals from the Board of Regents through the academic program review process for the State University System.

   University staff prepare a list of programs indicating which existing ones the university wishes to continue, expand, and delete during the five-year period of the survey as well as those for which planning authorization or program approval has been granted.

8. The survey director receives information about facility needs as determined by the fixed capital outlay ten-space category needs generation formula prepared by the Board of Regents from the survey advisor and gives it to the survey coordinator.

9. University staff furnish site plans and building schematics for all sites and buildings of the university, for which title is vested in the Board of Regents in trust by the Department of Natural Resources, Internal Improvement Trust Fund, and for those leased for more than one year to the university. Together, staff of the university, the Board of Regents, and the Planning and Evaluation Section, validate and correct data for sites, buildings, and rooms carried in the computerized physical facilities space files as well as the site plans and building schematics.

10. University administrators and staff prepare lists for each site of needs identified by the university for site acquisition, development, and improvement, remodeling, renovation, and new construction. Outdoor physical education facilities are included under site improvement. Items may be included for projects recommended by the prior survey which have not been started or funded through construction but still are needed.

    Items for remodeling and renovation contain specific information: building number and name; room numbers; current functions of spaces, use codes, and square footages; as well as needed functions of spaces, use codes, and square footages. Items for new construction specify needed functions of spaces, use codes, and net and gross square footages.

    Cost estimates are provided for items for site acquisition, development, and improvement; they may be furnished for other items as well. Cost estimates for survey recommendations involving building square footage are based on cost figures for the university used in the legislative capital outlay budget request for the fiscal year in which the survey is conducted. The survey director can provide these cost figures to the survey coordinator.

11. University staff prepare a survey workbook for use by survey staff during the needs assessment segment of the educational plant survey. The workbook contains documentation related to items 6, 7, 8, 9, and 10, above. It also contains general background information about the university. It is supplemented by a current university catalogue as well as available information regarding long-term plans for the institution, such as the master plan or other long-range planning documents.

    A copy of the survey workbook is provided for each survey staff member. One copy, along with the catalogue and long-term plans, is given to the survey director at least ten days before the opening date of the needs assessment segment of the survey. The other copies may be distributed to survey staff at the beginning of the needs assessment.

12. The survey advisor furnishes the survey director with particular financial information pertaining to capital outlay allocations by fund source and capital outlay allocations by project type.

13. The survey director and team conduct the needs assessment segment of the educational plant survey on site at the university. They visit and evaluate all existing sites and facilities. They study and analyze all available information relevant to educational and ancillary plant needs. They consider formula needs, examine justifications of exceptional needs, and discuss the needs with university administrators and staff. Finally, they develop recommendations to provide for the needs.

14. The survey director, aided by survey staff, prepares the written report of findings and recommendations for the university and the Board of Regents. An official copy is filed with the Office of Educational Facilities.

Section II

OVERVIEW OF THE INSTITUTE OF FOOD AND AGRICULTURAL SCIENCES

The goal of the educational plant survey is to assist the university by developing a plan for housing the programs and services provided by the university. Educational plant needs are the focus of the survey. It also helps to have a general understanding of the university. The following information was provided by the University of Florida, Institute for Food and Agricultural Sciences (IFAS).

IFAS Mission

IFAS was organized to link the academic programs of the University of Florida with research and extension programs in food, agriculture, natural resources and aspects of veterinary medicine to serve a diverse clientele throughout the state. In providing that linkage, IFAS serves as a major component in the land grant mission of the University of Florida.

Under Rule 6C1-6.001, Florida Administrative Code, "the primary mission of the Institute of Food and Agricultural Sciences is to help Florida realize its maximum potential for agricultural (including food, fiber, and environmental horticulture) development and to contribute to the solution of social, economic, environmental and cultural problems of concern to the people of Florida..."

The IFAS mission, therefore, includes not only diverse program areas (food and agriculture, natural resources, aspects of veterinary medicine, youth, development, home economics) but also a widely varying clientele ranging from commercial agricultural interests and small scale farmers to regulatory agencies, homeowners, consumers and youth.

Historical Development of IFAS

The Institute of Food and Agricultural Sciences (IFAS) is the primary land grant component of the University of Florida, the state's first and larger land grant college. IFAS has a directed research and development mission which makes it unique within the State University System.

In 1884, the State began a formal resident teaching program through the Florida Agricultural College at Lake City, Florida. This action was in response to federal legislation, the Morrill Act of 1862. That College moved to Gainesville in 1906 and merged with East Florida Seminary to form the State's first land grant institution, the University of Florida.

Congressional action in 1885, the Hatch Act, was assented to by the Florida Legislature in 1885 leading to the creation of the Florida Experiment Station. The Smith-Lever Act of 1914 created the Extension Service in Florida as assented to by the Florida Legislature in 1915. The School of Forestry was created in 1939 by action of the Florida Legislature.

In 1964, the University of Florida's food, agricultural and natural resources program units - the College of Agriculture, the School of Forestry, the Florida Experiment Station and the Florida Extension Service - were consolidated into the Institute of Food and Agricultural Sciences (IFAS). The formation of IFAS resulted in a unified, coordinated effort in food, agriculture and natural resource resident instruction, research and extension programs.

IFAS Functional Programs

The four independent organizations from which IFAS was formed became functional areas with IFAS as follows: instruction, research, and extension. Administratively, all three functions report directly to the Vice President for Agriculture and Natural Resources.

IFAS instruction programs are headed by the Dean for Academic Programs and are conducted in the College of Agriculture, the School of Forest Resources and Conservation, and the Department of Agricultural Engineering. IFAS Academic Programs formally educate students and provide a strong foundation for careers in agriculture, natural resources, agribusiness, food processing and distribution, and science. Many faculty who do not formally teach classes are nonetheless involved in the teaching process through their supervision of graduate student research programs.

Within the IFAS mission and organization, the Florida Agricultural Experiment Station is the administrative entity through which the University of Florida cooperates with the Federal and other State Governments in conducting food, agricultural and natural resource research programs. A dean is responsible for the leadership of the total statewide research efforts in IFAS and is designated Dean for Research.

The IFAS statewide research program is administered through academic departments and research and education centers throughout Florida. The IFAS departments and centers jointly pursue the mission to define, clarify and solve important problems facing farmers, business people, public decision makers and other citizens of Florida. Regardless of location, all researchers have appointments as faculty within an IFAS academic department, and therefore have access to the educational and scientific resources of the University of Florida.

The third functional element of IFAS is the Florida Cooperative Extension Service, headed by the Dean for Extension. The goal of extension is to help solve agricultural, home economics, and related problems of the people of Florida through educational programs helping people apply research findings and systems expertise.

Extension is deeply involved in the timely identification of important research needs, which comprise a significant portion of the research component of IFAS. Extension faculty in Gainesville have statewide responsibility for facilitating the use of research information by county extension faculty and user groups and individuals.

The University of Florida College of Veterinary Medicine is jointly administered by IFAS and the Health Science Center. The Dean of the College reports to both the Vice President for Agriculture and Natural Resources and the Vice President for Health Affairs.

IFAS administration provides support functions for faculty programs statewide. Such activities as finance and accounting, purchasing, administrative computing center, computer network, educational media, personnel, facilities operation and maintenance and extramural resource development assist IFAS faculty throughout the state by freeing them to effectively conduct successful research, technology and information transfer and information systems management programs.

Section III

ANALYSIS OF STUDENT POPULATION

Student enrollment is the single most important factor considered by the survey team in making decisions related to planning square footage size and total amount of facilities. The unit of enrollment used by the survey is the capital outlay full-time-equivalent student (COFTE). One undergraduate COFTE represents enrollment in 40 credit hours during the academic year; one graduate COFTE stands for 32 credit hours. The level of enrollment used is the number of COFTE projected for the fifth year beyond the fiscal year in which the survey is conducted. This is consistent with the five-year planned enrollment cycle for the State University System.

The survey uses COFTE projections prepared by the Board of Regents. Projections are provided for all credit activity at each site for which facilities are required. Enrollments are identified by discipline group within level of student.

Planned Enrollments

The projected enrollments for the University of Florida, Institute of Food and Agricultural Sciences, prepared by the Board and used in the survey, are presented by discipline for the combined sites which constitute the Alachua County segment of IFAS, in the following tables. Table 1 gives COFTE projections for lower level undergraduate students, Table 2 for upper level undergraduate students, and Table 3 for graduate students. Table 4 provides a summary of the projections and Table 5 shows an analysis of enrollment change from the base year of 1993-94 to the projection outyear of 1998-99.

The enrollment projections presented here were developed for use in the generation of capital outlay needs only. They were prepared by level but not by discipline. The enrollment projections by discipline shown here are based on the current year discipline distribution of FTE enrollments.

Percentage Change	61.76%	19.69%	11.90%	22.66%

Section IV

ACADEMIC PROGRAMS OF THE UNIVERSITY

Decisions regarding academic programs provided by the university come under the purview of the university president and the Board of Regents. Consistent with Section 240.227(16), F.S., the president makes recommendations to the Board regarding establishment as well as termination of degree programs. The Board, under the provisions of Section 240.209(3)(c) and Section 240.209(3)(i), F.S., clearly has responsibility for approving new degree programs for all state universities as well as terminating programs when evidence warrants.

Further, in accordance with Section 240.209(3)(j), F.S., the Board is responsible for adopting a systemwide master plan for the State University System as well as a master plan for each university which identifies the degree programs to be offered at the university. Pursuant to Section 240.2095(1)(d), F.S., new programs for a university can be approved only if they are consistent with the master plans.

When a university wants to begin a new degree program, the proposal must pass through the academic review process for the State University System. In accordance with Section 6C-3.08, FAC, the university president must request and receive authority from the Board of Regents first to study the feasibility of the new program, then to plan the program, and finally to implement it.

The supportive role of the educational plant survey is to formulate a plan for housing the programs and services offered by the university. The survey team developed a comprehensive five-year plan for appropriately accommodating the academic programs, student population, faculty, administrators, staff, and auxiliary and ancillary services of the university.

The University of Florida, Institute of Food and Agricultural Sciences provides a wide variety of agriculturally related academic, research and extension programs.

IFAS Research Programs

The IFAS research mission of creating new knowledge in food, agriculture and natural resources is carried out in Gainesville and at 27 research and education centers throughout the state. This educational plant survey deals only with those programs identified as part of the main campus and which are located on campus and within Alachua County.

The food, agriculture, and natural resources industry is a $40 billion business in Florida and the state has 40 commodities with cash receipts of over $5 million. To insure the vitality of agriculture, and environmental quality, IFAS research programs range from wildlife and forestry to citrus to tomatoes to peanuts as well as cattle, poultry, swine, horses and other livestock and animals; from water quality to recycling to biocontrol to ecological restoration and managed ecosystems. Florida has a thriving ornamental plant industry and IFAS conducts research to insure that it remains strong.

IFAS research is characterized on a continuum of fundamental long-term research to results that are of direct immediate benefit to Florida. Some research results will be the introduction of new crop varieties for use now, while other research results will provide tangible dividends sometime in the future.

Potential problems, such as the introduction of a new pest from overseas, means IFAS must be capable of responding quickly to a crises situation. A part of IFAS research is preventative in nature, developing solutions for possible problems in the future.

IFAS Extension Programs

In the field of Extension, IFAS operates the extension offices located in each of Florida's 67 counties on a cooperative basis with county and federal governments. Extension efforts may include helping farmers learn of the availability of alternative crops in northwest Florida to working on the problems of commercial fishermen in south Florida. IFAS is involved in water quality efforts throughout the state and has on-going waste treatment projects with the City of Orlando and the City of St. Petersburg.

The key to successful extension work is the rapid application of research information to all citizens. Through the 67 counties extension offices, IFAS is able to provide up-to-date material to large and small farmers, agriculturally related businesses, consumers, homeowners, youth and government agency professionals.

Although county offices key to the county in which they are located, the public has access to information generated all over the sate and nation. IFAS, through Extension is responsible for volunteer programs including Master Gardener program as well as the 4-H program for youth.

While much material is available in written, pamphlet form, today's new technology means new challenges as IFAS strives to disseminate information over computer networks and make it available in software packages and CD-Rom as well.

The advent of the VCR and the more recent satellite technology has rapidly expanded the utilization of multi-media and video presentations to individuals, groups and organizations throughout the state.

ACADEMIC PROGRAMS OF
UNIVERSITY OF FLORIDA, INSTITUTE FOR FOOD AND AGRICULTURAL SCIENCES
ON CAMPUS - ALACHUA COUNTY

The College of Agriculture conducts the degree granting programs in IFAS. Degrees are offered through the following departments:

- Agricultural Education and Communication
- Agricultural Engineering
- Agronomy
- Animal Science
- Botany
- Dairy Science
- Entomology and Nematology
- Fisheries and Aquatic Sciences
- Food and Resouce Economics
- Food Science and Human Nutrition
- Horticultural Sciences
- Microbiology and Cell Science
- Environmental Horticulture
- Plant Pathology
- Poultry Science
- Soil and Water Science
- Statistics
- School of Forest Resources and Conservation
  - Forestry Department and Wildlife and Range Sciences Department

Section V

INVENTORY OF EXISTING SITES AND BUILDINGS

During the educational plant survey, members of the survey team visited all existing sites and buildings of the university for which titles are vested in the Board of Regents, in trust by the Department of Natural Resources, Internal Improvement Trust Fund, as well as those under long-term lease to the university. They examined buildings with regard to physical condition to determine whether they could be classified as satisfactory and recommended for continued use. They also evaluated facilities with respect to adequacy and suitability for accommodating the academic programs and related services provided by the university.

Description of Sites

The University of Florida, Institute of Food and Agricultural Sciences, has seven owned sites located in Alachua County. They are grouped, for the purposes of this educational plant survey, under one final heading of "On Campus - Alachua County" even though several of the following summary tables give extensive information about the individual sites. A map, locating the individual sites, is found on page 26.

Main Campus

Site 1, Main Campus, is located west of S. W. 13th Street and south of West University Avenue, in downtown Gainesville. It is part of the University of Florida's Main Campus. IFAS occupies 252 permanent and 83 temporary buildings. There are two buildings presently under construction. The buildings are located on 480 acres and include 1,307,508 GSF. Maps of the site are found on pages 38 to 43; the buildings are listed in Table 8.

Sand Hill Farm

Site 6, Sand Hill Farm is located on S. W. 23rd Street in Gainesville. There are three permanent and one temporary buildings enclosing 17,460 GSF on 50 acres. A map of the site is found on page 45; the buildings are listed in Table 9.

Austin Cary Forest

The Austin Cary Forest, Site 7, is located north of the Gainesville Airport on State Road 24. The facilities consist of 22 permanent buildings and four temporary buildings on 2,040 acres of land. There are 28,730 GSF at this site. A map of the site is found on page 47; the buildings are listed in Table 10.

Beef Research Unit - Monteocha Road

The Beef Research Unit, Site 8, is located northeast of downtown Gainesville and west of the Austin Cary Forest. There are 17 buildings, all of which are permanent. They enclose 31,980 GSF on 1,128 acres of land. A map of the site is found on page 49; the buildings are listed in Table 11.

Dairy Research Unit - Hague

Site 9, for Dairy Research, is located ten miles northwest of downtown Gainesville on U.S. 441 in the Hague community. There are 37 buildings, 31 of which are permanent and six temporary. 112,010 GSF are located on 1,089 acres of land. A map of the site is found on page 52; the buildings are listed in Table 12.

Green Acres - Farnsworth

Site 10 consists of 243 acres for agronomy research and is located ten miles west northwest of Gainesville on S. R. 241. There are 18 buildings, six of which are temporary, and 22,930 GSF. A map of the site is found on page 54; the buildings are listed in Table 13.

Horticulture Unit - Millhopper Road

The Horticulture Unit, Site 12, is 524 acres and located seven miles northwest of downtown Gainesville on Millhopper Road. There are ten temporary and 34 permanent buildings with 62,830 GSF at this location. A map of the site is found on page 57; the buildings are listed in Table 14.

Description of Buildings

The owned academic buildings of the university are listed by site in Tables 8 through 14. In the tables, the building number and name are given. The status information refers to the degree of permanence of the building based on structural materials and life expectancy. For example, a building constructed of masonry and steel and having a fifty-year lifetime is classified as permanent. One constructed of wood and having a much shorter life span is listed as temporary. During the period between the construction contract award and the final inspection, a building is classified as under construction.

The condition classification reports whether the physical quality of the building has been evaluated by the survey team as satisfactory or unsatisfactory. Buildings described in the table as satisfactory or in need of remodeling or renovation are included in the satisfactory category. Those identified as in need of demolition or appropriate for termination are included in the unsatisfactory category. Facilities determined to be satisfactory by the survey are recommended for continued use.

BEST COPY AVAILABLE

Assignable square footage (ASF) is defined as the sum of all areas on all floors of a building assigned to or available for assignment to and functionally usable by an occupant. Non-assignable square footage (NonASF) is the sum of all areas on all floors not available for assignment to an occupant, specifically, custodial, mechanical including toilet, and interior circulation spaces. Gross square footage (GSF) is the sum of the floor areas of the building included within the outside faces of exterior walls for all stories or areas which have floor surfaces.

The survey team evaluated all buildings at the seven owned sites. Their findings are described below. Site maps can be found with the appropriate inventory table.

Site 1. Main Campus

Site 1 has the most diverse grouping of buildings of any of the sites. Of the 252 permanent buildings, most are in satisfactory condition, but 36 require remodeling or renovation. Eight permanent buildings are unsatisfactory. Use of two should be terminated: Building 251, Irrigation Park Laboratory, and Building 682, Fruit Crops Greenhouse.

The other six need to be razed: No. 0085 - Agronomy/Physiology Laboratory; No. 0341 -Entomology Greenhouse; No. 0652 Physiology Unit; No.0667, Plant Pathology Growth Room; No. 0944, Sterilizer Shed; and No. 0946 - Implement Shed.

Of the 85 temporary buildings, most are in satisfactory condition, but six need to be remodeled or renovated. Seven temporary buildings are unsatisfactory. Use of one should be terminated: Building 639, Conferences and Institutes.

The other six need to be razed: No. 0825 - Agricultural Engineering Field Laboratory; No. 0829 - Field Shop; No. 881 - Storage; No. 896 - IFAS Information Trailer; No. 1244 - Laboratory/Office; and No. 1292 - Nematology Storage Trailer.

Site 6. Sand Hill Farm

All four buildings on Site 6 were found to be satisfactory.

Site 7. Austin Cary Forest

Of the 26 buildings on Site 7, 25 were found to be satisfactory while one requires renovation.

Site 8. Beef Research Unit - Monteocha Road

All 17 buildings except the pump house on Site 8 were found to be satisfactory. The pump house was damaged by inclement weather and insurance is funding the repairs.

Site 9, Dairy Research Unit - Hague

All 37 buildings on Site 9 were found to be satisfactory.

Site 10, Green Acres - Farnsworth

All 18 buildings on Site 10 were found to be satisfactory.

Horticulture Unit - Millhopper Road

All 44 buildings on Site 12 were found to be satisfactory.

During the needs assessment segment of the survey, certain buildings listed as satisfactory in the tables were further evaluated and found to be in need of remodeling or renovation. Recommendations for these buildings are included in Section VIII of this report.

Types and Amounts of Assignable Space

The assignable space of an educational plant accommodates a variety of functions including instruction, academic support, and institutional support. Instructional facilities include classrooms, teaching laboratories, and research laboratories as well as related service areas.

Auxiliary and ancillary facilities provide for the noninstructional functions of a university. Auxiliary facilities are those which house academic support and institutional support functions located at campuses and instructional centers. Ancillary facilities are those which provide for universitywide institutional support at central locations.

Academic support facilities include areas for library, instructional media, assembly and exhibition, and gymnasium functions. Institutional support facilities include student services facilities which consist of spaces for food, lounging, merchandising, recreation, and meeting room services for students as well as faculty, administrators, and staff; all office and conference facilities as well as administrative data processing areas; and support services facilities which consist of maintenance shops, central storage, and vehicle storage.

During the survey process, the square footage of the many types of facilities are grouped into ten standard assignable space categories: classroom, teaching laboratory, research laboratory, library, instructional media, assembly and exhibition, gymnasium, student services, office and computer, and support services. Besides the ten standard categories, there are two additional assignable space categories: residential, which includes dormitory, apartment, and other housing facilities; and other which consists of armory, athletic spectator seating, non-health clinic, demonstration, field, locker room, and health care facilities.

The survey also considers whether assignable space is eligible or ineligible for the fixed capital outlay space needs generation formula. Most positions, programs, and activities of the university generate space need according to the formula; the space in which they are housed is called eligible. However, certain other important positions, programs, and activities do not generate a need when the formula is used; the space provided for them is called ineligible. Such space can be part of any of the space categories.

The amount of eligible and ineligible space for all the assignable space categories in each satisfactory academic building of the University for which title is vested in the Board of Regents, in trust by the Department of Natural Resources, Internal Improvement Trust Fund, is presented by site in Tables 15 through 21. There is a separate table for each of the seven owned sites on which are located owned, satisfactory, academic buildings. Building numbers are not listed and space is not included for buildings determined to be unsatisfactory by the survey team, for residential facilities, and for the developmental research school. Unsatisfactory space in satisfactory academic buildings also is excluded. A summary of satisfactory, eligible space for the ten standard assignable space categories is given by site in Table 22.

SECTION VI

PLAN FOR HOUSING PROGRAMS, STUDENTS, PERSONNEL, AND SERVICES

The survey team developed a plan for housing academic programs, projected student enrollments, faculty, staff, and administrators, and auxiliary and ancillary services for the ensuing five-year period. The planning process required evaluation of existing educational plants, determination of future needs, and recommendations for changes and additions to existing plants to provide for future needs.

Determination of Needs

The basic method used to determine the facilities required by a university to accommodate educational programs, student enrollments, personnel, and services is the fixed capital outlay space needs generation formula. The space needs formula provides for instructional, research, academic support, student services, and institutional support services needs. It recognizes ten categories of space: classroom, teaching laboratory, research laboratory, library, instructional media, assembly and exhibition, gymnasium, student services, office and administrative data processing, and support services.

Although each of the ten categories is treated individually in the formula, only three basic methods are used for generating space. They include: space factors for scheduled space, allotments for nonscheduled space, and space provided as a percentage of other space. Further, while the capital outlay full-time-equivalent enrollment (COFTE) projection by site acts as primary generator, the formula recognizes variations in space requirements derived from discipline groupings, course levels, research programs, and library holdings as well as faculty, staff, and contract and grant positions. Thus, the formula results in campuswide aggregate square footage allocations for the ten standard assignable space categories based on the combination of students, programs, faculty, and staff unique to the university.

The alternative method for identifying facility needs is the exception procedure. This method is used where the university has special problems or extraordinary needs not supported by the formula. One example is unusual requirements for a particular type of teaching laboratory. Another example is minimal facilities for a program which are not provided by the space needs generated from the initial enrollment level for the program.

The particular space standards used in the fixed capital outlay needs generation formula for determining the needs of the combined sites of IFAS On Campus - Alachua County are displayed in Table 23. Aggregate square footage allocations for the ten standard assignable space categories as generated by the formula for the sites are presented in Table 24.

Plan for Accommodating Needs

Facility planning for housing educational programs, student enrollments, faculty, staff, and administrators, and auxiliary and ancillary services involves assessment of present plants, identification of future needs, and recommendations for remodeling, renovation, and new construction to meet the needs. During the survey, current physical facilities space file data were compared with square footage needs generated by the formula. Category aggregate square footages of existing space were measured against campuswide space allocations for the ten standard assignable space categories to evaluate what type of recommendations needed to be made by the survey.

The formula provides for many kinds of space but does not address all the space needs of a university. Therefore, the survey considered needs identified through the exception procedure as well. This approach deals with special problems and extraordinary needs not supported by the formula but justified by the university. For example, the formula does not allow for a critical mass of space required for a new program with only initial enrollment. Further, the formula does not generate space for some positions, programs, and activities which are important to the overall function and operation of the university. The latter kind of space is ineligible for or exempt from the capital outlay generation formula. Thus, existing ineligible space is not included within the space inventory which is compared with formula allocations.

The comparison of existing eligible space with formula generated square footage needs for the University of Florida, Institute of Food and Agricultural Sciences, is given by category for the combined sites in Table 25. A summary of the five year plan for accommodating both eligible and ineligible facility needs of the university, showing the effects of each recommendation, is presented by category in Table 26. Because site improvement recommendations do not effect building square footage, these recommendations are omitted from the table. The effects of remodeling, renovation (if any), and new construction recommendations are included.

Specific information related to the tables is provided throughout the survey report. Planned enrollments for 1998-99 are given in Section III. Academic programs are listed in Section IV. Existing

232

inventory information is found in Section V. Space utilization criteria are described in Section I. Space standards used in the fixed capital outlay needs generation formula are shown in Table 23 of this section.

Formula allocations for the ten space categories are presented in Table 24 of this section. The exception procedure for identifying needs is explained in Sections I and VI. Ineligible space is discussed in Sections V and VI. Recommendations for remodeling, renovation, and new construction are included in Section VIII.

TABLE 23

SPACE STANDARDS USED IN FIXED CAPITAL OUTLAY TEN SPACE CATEGORY NEEDS GENERATION FORMULA - INSTITUTE FOR FOOD AND AGRICULTURAL SCIENCES ON CAMPUS - ALACHUA COUNTY

Space Type by Category	Space Standard
Classroom	
Lower Level Undergraduate	8.82 ASF per FTE

Section VII

ANALYSIS OF CAPITAL OUTLAY FINANCES

The survey team developed a comprehensive plan for meeting the educational plant needs of the university for the succeeding five-year period. During the planning process it evaluated needs for site acquisition, development, and improvement, remodeling, renovation, and new construction. Implementation of the complete plan for the University of Florida, Institute of Food and Agricultural Sciences, On Campus - Alachua County, as set forth in the survey recommendations described in Section VIII was estimated to cost $ 29,508,475.

Financial capacity for accomplishing the plan depends upon the amount of future revenues made available to the university. Thus revenue sources accessible for capital outlay expenditure are discussed below. In addition, information regarding the source and distribution of recent capital outlay allocations is found in Tables 27 and 28.

Revenue Sources for Capital Outlay

Under the provisions of the Public Education Bond Amendment, Section 9(a)(2), Article XII, State Constitution, as amended, proceeds of revenues derived from gross receipts taxes for utility services are placed in the Public Education Capital Outlay and Debt Service Trust Fund. Revenues, interest, and proceeds derived from the sale of public education capital outlay bonds issued by the State Board of Education are used to finance capital projects for the state system of public education as authorized by the Legislature. Funds accruing under this section commonly are referred to as public education capital outlay (PECO).

Each year the Legislature allocates funds from the Public Education Capital Outlay and Debt Service Trust Fund appropriation to the various boards in the state system of public education. Pursuant to Section 235.41, F. S., the Commissioner of Education submits a comprehensive capital outlay budget request for all boards to the Legislature. In accordance with Subsection 235.435(1)(a), F. S., each board annually receives an allocation for remodeling, renovation, maintenance, repairs, and site improvement for existing satisfactory facilities. Further, under the provisions of Subsection 235.435(4)(a), F. S., the Board of Regents receives funds for projects based on a three-year priority list for the entire State University System included in the legislative budget request.

In addition, university students pay building fees and capital improvement fees (CIF). Pursuant to Subsection 235.42(2), F. S., these fees are collected by the Board of Regents, deposited in the Public Education Capital Outlay and Debt Service Trust Fund, and allocated by legislative appropriation. In accordance with Subsection 240.209(3)(h), F. S., the fee rates are established at $2.44 per credit hour per semester for the capital improvement fee and $2.32 for the building fee.

Further, Subsection 240.295(2), F. S., provides additional authority for the State University System to construct and remodel buildings when they are funded by nonstate sources and operated and maintained by other than state general revenue; to replace buildings destroyed by fire or other calamity; and to perform other construction and remodeling projects which do not exceed $100,000.

Moreover, pursuant to Subsection 243.131(1), F. S., the Board of Regents may negotiate with the federal government as well as other governmental and private agencies for funds to construct dormitories and other auxiliary accommodations to serve student and faculty needs. Such loans are secured by issuance of revenue certificates which are retired by income derived from rental of the facilities.

**Fund Sources include Public Education Bond Amendment (PECO) and Educational Enhancement/Lotteries (EE).

Section VIII

RECOMMENDATIONS FOR EDUCATIONAL PLANTS

The comprehensive five-year plan for meeting the educational plant needs of the University of Florida, Institute of Food and Agricultural Sciences, On Campus - Alachua County is specified in the list of recommendations formulated by the survey team. The plan provides for housing the educational program, student population, faculty, administrators, staff, and auxiliary and ancillary services of the university.

Survey recommendations establish the need for university facilities (Section 240.295(1), F.S.). Recommended items are the basic components of projects used in developing long-range plans for educational plants and auxiliary and ancillary facilities (Section 235.16, F.S.), in adopting capital outlay budgets (Section 235.18, F.S.), in preparing fixed capital outlay legislative budget requests (Section 240.209(3)(d), F.S.), and in submitting three-year plans for the Commissioner's annual legislative capital outlay budget request (Section 235.41(2), F.S.).

Survey recommendations are required for all remodeling, renovation, and new construction projects included in the three-year priority list for legislative funding, prepared by the Board of Regents for the budget request (Section 235.435(4)(a), F.S.).

Recommendations support university staff in preparing building programs (Rule 6C-14.020(1), FAC), and the university president in submitting plans for construction, renovation, and campus development to the Chancellor (Rule 6C-4.01(3), FAC) and in recommending a master plan for physical plants and grounds to the Chancellor (Rule 6C-4.01(5)(c), FAC).

They also provide guidance for the Chancellor in approving building programs, major renovations, and facilities budgets (Rule 6C-1.10(2)(i)2, FAC), and in recommending university construction funds to the Board of Regents (Rule 6C-1.10(2)(i)1, FAC).

Recommendations can be made only for officially designated sites. These sites include main campuses listed in Section 240.2011, F.S., branch campuses approved by the State Board of Education and authorized by the Legislature through the appropriations process, and centers and special purpose centers ratified by the Board of Regents. Recommendations for any leased sites and facilities are made in accordance with the provisions of Section 235.055, .056, F.S.

Recommendations are grouped by site according to the classifications of site acquisition, development, and improvement, remodeling, renovation, and new construction, as defined in Section 235.011, F.S. Occasionally a recommendation occurs which encompasses more than one classification; such recommendations are included under the combination category.

Cost estimates included with recommendations were current at the time of the survey. Estimates for new construction were based on the unweighted average gross square foot cost of construction for the university used in the legislative capital outlay budget request for the fiscal year in which the survey was conducted. The amount for the University of Florida, Institute of Food and Agricultural Sciences, On Campus - Alachua County, was $117.88 per gross square foot (GSF). Estimates for remodeling for On Campus were calculated at one-half of that amount or $58.94 per net square foot (NSF). Those for renovation were figured at one-third or $39.30 per NSF. Cost estimates for recommendations not involving building square footage were based on the best available relevant information.

However, the cost estimates are not part of the recommendations. They are added to provide a general idea of anticipated costs and are not accurate estimates for particular projects. At the time the university requests funding for a specific project, university staff need to prepare actual cost estimates which then are reviewed by the Board of Regents. Often, actual estimates will vary significantly from those included with recommendations.

At the end of the list, five standard recommendations are given for universitywide application, as needed. They address general categories of physical plant need which are likely to occur across time. No cost estimates are included with these recommendations.

SITE 1: MAIN CAMPUS

Renovation

01.01. Renovate Building 0013 - Wilmon E. Newall Hall; all rooms; 30,330 GSF.

Estimated Cost: $1,191,969

01.02. Renovate Building 0058 - IFAS Information; all rooms; 2,060 GSF.

Estimated Cost: $80,958

01.03. Renovate Building 0063 - Agronomy Soy Bean Laboratory; all rooms; 2,330 GSF.

Estimated Cost: $91,569

01.04. Renovate Building 0064 - Agronomy Weeds Science Laboratory; all rooms; 2,310 GSF.

Estimated Cost: $90,783

01.05. Renovate Building 0066 - C. N. Webb Livestock Pavilion; all rooms; 23,950 GSF.

Estimated Cost: $941,235

01.06. Renovate Building 0076 - Poultry Science Conference Building; all rooms; 1,340 GSF.

Estimated Cost: $52,662

01.07. Renovate Building 0083 - Agronomy Physiology Offices; all rooms; 390 GSF.

Estimated Cost: $52,662

01.08. Renovate Building 0087 - Home Economics Offices; all rooms; 1,810 GSF.

Estimated Cost: $15,327

01.09. Renovate Building 0107 - Agronomy Field Lab; all rooms; 3,600 GSF.

Estimated Cost: $141,480

01.10. Renovate Building 0116 - Educational Media "B"; all rooms; 4,740 GSF.

Estimated Cost: $186,282

01.11. Renovate Building 0120 - Computer/Micro/Toxicology Building; all rooms; 16,330 GSF.

Estimated Cost: $641,769

01.12. Renovate Building 0150 - Agricultural Engineering Offices; all rooms; 1,740 GSF.

Estimated Cost: $68,382

01.13. Renovate Building 0152 - Egg Incubator Storage Building; all rooms; 2,240.

Estimated Cost: $88,032

01.14. Renovate Building 0154 - IFAS Storage Building; all rooms; 1,000 GSF.

Estimated Cost: $39,300

01.15. Renovate Building 0164 - Agronomy Physiology Building; all rooms; 3,190 GSF.

Estimated Cost: $125,367

01.16. Renovate Building 0172 - Newell Annex; all rooms; 3,870 GSF.

Estimated Cost: $152,091

01.17. Renovate Building 0177 - Veterinary Science Parasite Laboratory; all rooms; 3,960 GSF.

Estimated Cost: $155,628

01.18. Renovate Building 0193 - Agronomy Cytology Laboratory; all rooms; 680 GSF.

Estimated Cost: $26,724

01.19. Renovate Building 0194 - Agronomy Volatile Storage; all rooms; 80 GSF.

Estimated Cost: $3,144

01.20. Renovate Building 0495 - Dan McCarty Hall A; rooms G139, G147, G147A, G149, G154, G155A, G155B, G155D, G155E, G158, G159, G163, G165, G166, G169, G171, G175, G175A, G176, G176A, G179, G179A,G181,G183A, G183B, G183C, G184, G186, G187, G187A, G197, G197A, G197B, G197C, G197D, G199, G211, 1142, 1147, 1151, 1155, 1157, 1158, 1158A, 1158B, 1161, 1163, 1166, 1167, 1170, 1170A, 1170B, 1171, 1172, 1172A, 1175, 1177, 1179, 1181, 1183, 1184, 1185, 1186, 1189, 1191, 1193, 1195, 1196, 1197, 1197A, 1199, 1205, 2141, 2142, 2143, 2146, 2147, 2149, 2153, 2157, 2158, 2159, 2161, 2163, 2164, 2164A, 2164B, 2165, 2167, 2169, 2170, 2170A, 2170B, 2171, 2175, 2176, 2176A, 2176B, 2177, 2179, 2181, 2182B, 2183, 2185, 2186, 2189, 2191, 2195, 2196, 2197, 2199, 3191, 3197, 3197A, 3197B; 53,170 GSF.

Estimated Cost: $2,089,581

01.21. Renovate Building 0502 - Blockbarn; all rooms; 5,230 GSF.

Estimated Cost: $205,539

01.22. Renovate Building 0525 - Materials Storage Shed; all rooms; 520 GSF.

Estimated Cost: $20,436

01.23. Renovate Building 0559 - Norman Mehrhof Hall; all rooms; 5,200 GSF.

Estimated Cost: $204,360

01.24. Renovate Building 0582 - Agronomy Herbicide Storage; all rooms; 390 GSF.

Estimated Cost: $15,327

01.25. Renovate Building 0584 - Headhouse, Plant Pathology; all rooms; 330 GSF.

Estimated Cost: $12,969

01.26. Renovate Building 0619 - Entomology Field Laboratory; all rooms; 980 GSF.

Estimated Cost: $38,514

01.27. Renovate Building 0626 - Animal Climatology Laboratory; all rooms; 1770 GSF.

Estimated Cost: $69,561

01.28. Renovate Building 0631 - Wallace Building; all rooms; 6,670 GSF.

Estimated Cost: $262,131

01.29. Renovate Building 0669 - Greenhouse, Plant Pathology; all rooms; 1,800 GSF.

Estimated Cost: $70,740

01.30. Renovate Building 0697 - Plant Pathology Research Laboratory 1; all rooms; 1,520 GSF.

Estimated Cost: $59,736

01.31. Renovate Building 0716 - IFAS Mechanical Equipment Building; all rooms; 3,950 GSF.

Estimated Cost: $155,235

01.32. Renovate Building 0803 - McCarty Annex B; all rooms; 2,790 GSF.

Estimated Cost: $109,647

01.33. Renovate Building 0810 - McCarty Annex A; all rooms; 2,790 GSF.

Estimated Cost: $109,647

01.34. Renovate Building 0866 - Entomology Annex; all rooms; 1,830 GSF.

Estimated Cost: $71,919

01.35. Renovate Building 0913 - Building DT; all rooms; 80 GSF.

Estimated Cost: $3,144

01.36. Renovate Building 0940 - Honey Laboratory; all rooms; 1,020 GSF.

Estimated Cost: $40,086

Total Renovation $7,683,936

Remodeling

01.37. Remodel Building 496 - McCarty Hall B; rooms 3082, 3082A, 3087, 3111, 3120, 3120A, 3120 B, 3120C, 3120D, 3120E, 3124; as classroom facilities and service areas; use codes 110,115; 444 NSF; as office/computer facilities and service areas; use codes 310, 315, 350, 355, 710, 715; 1,370 NSF; and as circulation, custodial, sanitation, mechanical facilities; use codes WWW, XXX, YWC, YYY; 350 NASF; 2,164 NSF.

Estimated Cost: $127,546

Total Remodeling: $127,546

New Construction

01.38. Construct agricultural engineering teaching and research facility to include: classroom facilities and service areas; use codes 110, 115; 2,920 NSF; teaching laboratory facilities and service areas; use codes 210, 215, 220, 225, 230, 235, 240, 245; 9,000 NSF; research laboratory facilities and service areas; use codes 250, 255, 570, 575, 580, 585; 40,600 NSF; student services facilities and service areas; use codes 630, 635, 650, 655, 660, 665, 670, 675, 680, 685; 1,000 NSF; office/computer facilities and service areas; use codes 310, 315, 350, 355, 710, 715; 13,880 NSF; and circulation, custodial, sanitation, mechanical facilities; use codes WWW, XXX, YWC, YYY; 28,335 NSF; total 67,400 NASF; 95,735 GSF.

Estimated Cost: $11,285,242

01.39. Construct library facilities and service areas; use codes 410, 420, 430, 440, 455; 8,998 NSF; 12,781 GSF.

Estimated Cost: $1,506,624

01.40. Construct instructional media facilities and service areas; use codes 530, 535; 8904 NSF; 12,647 GSF.

Estimated Cost: $1,490,828

01.41. Construct assembly/exhibition facilities and service areas; use codes 610, 615, 620, 625; 4,425 NSF; 6,285 GSF.

Estimated Cost: $740,876

01.42. Construct student services facilities and service areas; use codes 630, 635, 650, 655, 660, 665, 670, 675, 680, 685; 8,118 NSF; 11,531 GSF.

Estimated Cost: $1,359,274

01.43. Construct office/computer facilities and service areas; use codes 310, 315, 350, 355, 710, 715; 31,738 NSF; 45,081 GSF.

Estimated Cost: $5,314,148

Total New Construction: $21,696,993

Total Site 1: $29,508,475

SITE 7: AUSTIN CAREY FOREST

Renovations

07.01. Renovate Building 0818 - Tool Shed; all rooms; 700 GSF.

Estimated Cost: $27,510

Total Renovation: $27,510

Total Site 7: $27,510

Total University: $29,508,475

UNIVERSITYWIDE STANDARD RECOMMENDATIONS

SR.01. Provide custodial services facilities.

SR.02. Provide sanitation facilities for serving students, staff, and the general public.

SR.03. Correct deficiencies related to safety, health, and sanitation.

SR.04. Replace defective roofs and roofing membranes, except those of unsatisfactory buildings, identified in this survey report as scheduled for demolition or termination.

SR.05. Modify facilities, recommended for continued use in this survey report, to comply with requirements of Americans with Disabilities Act of 1990, Public Law 101-336, pursuant to the "Florida Americans with Disabilities Accessibility Implementation Act," Sections 553.501 - 553.513, Florida Statutes.
